From JKGCA to *JGC*

- Name change
 - *Journal of Gastric Cancer*
- Renewal of cover design
 - Add eISSN number
- Online submission system
 - www.jgc-online.org
- List in Synapse and get d.o.i
 - Contract with XMLink
- Reorganize editors and review system
- Transform to an English journal (translation service)

New Generation of *JGC*

- Change of Publication company
 - *Xmlink*
- Change of online submission system
 - ScholarOne/Clarivate Analytics
 - <https://mc04.manuscriptcentral.com/journalgc>
- Re-renewal of homepage & all journal design
 - with *Xmlink*
 - <https://jgc-online.org/>
- Deputy/Associate editor system
- International editorial boards
- Pubmed Central/SCOPUS/Science Citation Index Expanded

Pubmed Central

Dear Dr. Han,

We've finished our review for Journal of Gastric Cancer, and are pleased to report that the journal has passed the data evaluation stage of PMC acceptance.

Next steps:

1. PMC Participation Agreement: Please complete and sign a PMC participation agreement:

<http://www.ncbi.nlm.nih.gov/pmc/assets/pmcagree.doc>

2. PMC Journal Setup Requirements: Please provide a banner image and preferences for journal presentation style, following PMC Journal Setup Requirements: <http://www.ncbi.nlm.nih.gov/pmc/pmcdoc/pubsetup.doc>

3. PMC FTP Account: PMC will send you an account on our FTP site for production submissions once we receive your signed agreement.

4. Data evaluation: A single image file was missing for an article in 10(4). Please see the attached report (jgc_eval.doc) for details Please be sure to include the missing file when the issue is resubmitted to the production FTP account.

If you have any questions, please let me know.

Best Regards,

Chris

SCOPUS

Title: Journal of Gastric Cancer
ISSN / E-ISSN: 2093-582X / 2093-5641
Publisher: The Korean Gastric Cancer Association

Aug, 2012

Dear Hur Hoon,

The title mentioned above has been evaluated for inclusion in Scopus by the Content Selection & Advisory Board (CSAB). The review of this title is now complete and the CSAB has advised that the title will be **accepted for inclusion in Scopus**. For your information, the reviewer comments are copied below:

This is a well presented and speciality focussed journal in English. Manuscript flow is not high and the academic contribution is presently limited, but it merits inclusion in SCOPUS with the prospect of a widening readership and authorship.

If necessary, our Source Collection Management department will contact the publisher in order to set up the content feed for Scopus. The title will be loaded in Scopus as soon as we have access to the title and the content has been processed for indexing. At this moment, there is no further action required from your end.

Yours sincerely,
Scopus Title Evaluation Support
titlesuggestion@scopus.com

Science Citation Index Expanded

Clarivate Analytics has formally accepted the Journal of Gastric Cancer into SCIE. **Journal of Gastric Cancer content from 2015 forward will be indexed in SCIE.** The journal's issues published from 2005-2014 will be indexed in ESCI. With that in mind, the journal is eligible for inclusion in next year's JCR (June 2018), providing it an Impact Factor at that time.

Please retain this e-mail as formal notification of our editorial decisions.

Best regards,
Matt Rice
Publisher Liaison

SCIE rejection

■ 2015-11

- Editor 1 (Katherine Junkin Baumgartner)

Han Hong Lee
Assistant editor
Dear Dr. Lee,

We have browsed the recent issues of the *Journal of Gastric Cancer JGC* and find that we **cannot accept** it for coverage in the Science Citation Index-Expanded in the Web of Science Core Collection. This title's contents and **citations have improved but remain too dependent on Korean editorial board members** and authors to justify adding to the Web of Science Core collection at this time.

- Editor 2 (Matt Rice)

Dear Han Hong Lee,

Thank you for your message. We evaluated the Journal of Gastric Cancer for inclusion in SCIE when we selected it for ESCI. I regret to inform you that **we rejected the journal for inclusion in SCIE**. The primary reason for this decision was **low citation activity**. We also noted that the **editorial board and authors are primarily regional**; that is, there is little international diversity. We found, too, that **some authors are repeated within the same issue**.

With the above in mind, we did not select the journal for inclusion in SCIE. You may submit the journal to us for **SCIE evaluation again in November 2018** by using the form at <http://ip-science.thomsonreuters.com/info/journalsubmission-front/>.

Best regards,
Matt Rice

SCIE submission 합시다

Journal submissions and selection

Want to inquire about journal submissions and selection? Our [Journal Submission and Selection page](#) has all the information you need to get in touch with the right team. Here are some helpful shortcuts:

- Check the [Master Journal List](#) to see if a journal is already covered in Web of Science.
- Not covered? [Recommend a journal to our Publisher Relations team](#).
- Submit a journal for evaluation – and, if you are an editor or publisher and have submitted a journal for evaluation, you can [check the status on the Journal Evaluation page](#).

Web of Science journal evaluation process

1. Initial triage →		2. Editorial triage →		3. Editorial evaluation →			
Quality Criteria				Impact Criteria			
<ul style="list-style-type: none"> • ISSN • Journal title • Journal publisher • URL (online journals) • Content access • Presence of peer review policy • Contact details 		<ul style="list-style-type: none"> • Scholarly content • Article titles and article abstracts in English • Bibliographic information in Roman script • Clarity of language • Timeliness and / or publication volume • Website functionality / Journal format • Presence of ethics statements • Editorial affiliation details • Author affiliation details 		<ul style="list-style-type: none"> • Editorial board composition • Validity of statements • Peer review • Content relevance • Grant support details • Adherence to community standards • Author distribution • Appropriate citations to the literature 		<ul style="list-style-type: none"> • Comparative citation analysis • Author citation analysis • Editorial Board Citation Analysis • Content significance 	

Successful outcomes →			
Starts editorial triage	Starts editorial evaluation	Enters ESCI and is evaluated for impact	Enters SCIE / SSCI / AHCI

Unsuccessful outcomes →			
<p>Failed initial triage</p> <p>Re-submission welcome as soon as issues have been resolved</p>	<p>Failed editorial triage</p> <p>On first evaluation: Re-submission welcome as soon as issues have been resolved</p> <p>On consecutive evaluations: Re-submission subject to embargo of at least one year</p>	<p>Failed editorial quality evaluation</p> <p>Re-submission subject to embargo of at least two years</p>	<p>Failed editorial impact evaluation</p> <p>Entry / continued coverage in ESCI</p> <p>Citation activity is monitored. Re-evaluation subject to journal performance.</p>

Editorial Triage

In this step, the Web of Science editors review the journal to determine whether a full editorial evaluation is merited. There is no embargo period for re-submission if a journal does not pass editorial triage in its first evaluation. If a journal is subsequently re-submitted and fails editorial triage for a second consecutive time, re-submission is subject to an embargo period of one year.

Editorial Evaluation (quality)

In this step, the Web of Science editors are checking for alignment between the journal's title, stated scope, the composition of its editorial board and authorship, and its published content. They are also looking for evidence of editorial rigour and adherence to community standards.

Responsibility and accountability for the quality of all published content, including any special issue content, lies with the publisher and the editorial board of the journal.

If a journal does not pass this step, re-submission is subject to an embargo period of at least two years.

Web of Science Core Collection

SCIENTIFIC & ACADEMIC RESEARCH | PUBLISHING SOLUTIONS

Web of Science Publisher Portal

<https://clarivate.com/products/scientific-and-academic-research/research-publishing-solutions/publisher-portal/>

The Web of Science™ Publisher Portal is now open to all publishers, improving the journal submission process.

The Portal allows publishers to securely log in and submit journals for inclusion in the Web of Science Core Collection™ and provides a way to view the status of all submitted journals.

Information for publishers who wish to request access to the Web of Science™ Publisher Portal is available [here](#).

Please note:

- Only journal publishers will be granted access to the Publisher Portal and therefore only journal publishers can submit evaluation requests. **By registering for a Publisher Portal account, you are confirming you are authorized to submit journals to the Web of Science for evaluation on behalf of the publisher of the journal.**
- We currently are unable to receive hardcopy for new Web of Science journal evaluations in order to support our move to a digital workplace and to minimize the environmental impact on our global operations. More information on this initiative will be shared in due course.
- For journals covered in ESCI, it is no longer necessary to submit re-evaluation requests. Impact re-evaluations for journals currently indexed in ESCI will be conducted based on internal monitoring and not in response to requests submitted by publishers.

Please refer to our [selection criteria](#) to learn more about our editorial processes. We encourage you to [read our FAQs](#) and watch the video below to learn more about the Web of Science Publisher Portal and the information you will need in order to complete an evaluation request.

Publisher Portal Access Request

Access to the Publisher Portal is limited to journal publishers. Before completing this form please be sure to [register your account here](#).

Once you submit this form, our teams will review the information in approximately four weeks. Please [read our FAQs](#) for more information about Publisher Portal.

* Requestor first name

* Requestor last name

* Requestor E-mail

* Confirm E-mail

* Requestor phone number

* Requestor job title

* Select your role

* Publisher name

* Publisher address1

Publisher address2 (Optional)

* Publisher country/region

If assistance is required to fill in this form, please view this walkthrough [video](#).

Only journal publishers will be granted access to the Publisher Portal and therefore only journal publishers can submit evaluation requests. By registering for a Publisher Portal account, you are confirming you are authorized to submit journals to the Web of Science for evaluation on behalf of the publisher of the journal.

Note that your access request may be declined if we are unable to verify your identity and connection to the publisher with the information provided in the Access Request Form.

Submission 완료 (2015-3-31)

YOUR JOURNAL HAS BEEN RECEIVED

THANK YOU FOR YOUR RECENT JOURNAL SUBMISSION TO THOMSON REUTERS.

For your reference, please read our [Journal Selection Process Essay](#).

Please note for e-journals, complimentary access and an active URL are required to access the journal. If this information was not provided in your submission, your journal can not be accessed to begin the evaluation process.

Here are some questions that you may have regarding the evaluation process, existing journals, or contacts:

HOW DOES THE PROCESS WORK AFTER SUBMISSION?

Evaluation starts with three on-time, current, consecutive issues. Print issues should be forwarded individually as they are published; back issues are not accepted. If any issues are late, the evaluation process is put on hold until our editors receive three on time, current, consecutive issues. For more information, please read the [Journal Selection Essay](#).

WHAT HAPPENS WHEN THE EVALUATION IS COMPLETED?

If your journal is selected, we will contact you. You can use our [status request form](#) to check on the status of your journal while it is in evaluation. If a title is not selected, it could be eligible for re-evaluation in the future.

HOW CAN I SEE A LIST OF JOURNALS IN THOMSON REUTERS PRODUCTS?

[The Master Journal List](#) includes all journal titles covered in the Scientific Citation products of Thomson Reuters.

SCI(E) rejection

- 2015-11

- Editor 1 (Katherine Junkin Baumgartner)

Han Hong Lee
Assistant editor
Dear Dr. Lee,

We have browsed the recent issues of the *Journal of Gastric Cancer JGC* and find that we **cannot accept** it for coverage in the Science Citation Index-Expanded in the Web of Science Core Collection. This title's contents and **citations have improved but remain too dependent on Korean editorial board members** and authors to justify adding to the Web of Science Core collection at this time.

- Editor 2 (Matt Rice)

Dear Han Hong Lee,

Thank you for your message. We evaluated the Journal of Gastric Cancer for inclusion in SCIE when we selected it for ESCI. I regret to inform you that **we rejected the journal for inclusion in SCIE**. The primary reason for this decision was **low citation activity**. We also noted that the **editorial board and authors are primarily regional**; that is, there is little international diversity. We found, too, that **some authors are repeated within the same issue**.

With the above in mind, we did not select the journal for inclusion in SCIE. You may submit the journal to us for **SCIE evaluation again in November 2018** by using the form at <http://ip-science.thomsonreuters.com/info/journalsubmission-front/>.

Best regards,
Matt Rice

SCIE 탈락에 대한 항의서신 발송

Dear Matt,

Thank you very much for your kind explanation on our journal. We also appreciate you for your selection of our journal to ESCI. It will be good chance for our journal to be connected to the international journal network via ESCI.

We understood that the primary reason not to be selected as SCIE journal was low citation activity. Also, the shortness is regional editorial board and authors. The same author's articles in the same issue are another problem.

We checked the impact factor and total citation of our journal again in Web of Science through cited reference search function. Total 151 articles of *Journal of Gastric Cancer* has been cited 621 times by Web of Science articles. 2015 Impact factor can be calculated as $91/80=1.1375$ at now and 2014 impact factor can be calculated as $113/78=1.449$. We are not sure what is the criteria of low citation. When we compare this value to present SCIE journal in JCR, it corresponds to 83.4% in the category of ONCOLOGY and 52.0% in the category of SURGERY. We believe that 2015 impact in April 2016, may be able to soar to more than 1.5. *The criteria of low citation means better than 70 or 80% of present JCR, we will try to publish high quality articles at our best.*

As for editors' and authors' multi-nationality, Yes, we will invite editors from all over the world and we will also recruit the manuscript from all over the world.

As for same author's articles in the same issue, we found that in the recent issue, there were two papers submitted by same author as corresponding author. We are not sure if "two submissions in one issue by same author" is a hindrance or shortness in the international journal publishing standard. We could not hear about it from any editors. *Is it your criteria to consider for inclusion to SCIE?* We do not think that "submission of two manuscripts to one issue by same corresponding author" may deter integrity of the journal. We believe that important issue is the quality of article. Those articles can be published after process of vigorous peer review. However, it is the problem, we will not publish same corresponding author's article at the same issue.

Your comments were valuable to me to edit our journal. Would you please inform us about above statements? It will be our great pleasure if we can hear from you soon.

Would mind if we ask you to re-evaluate our journal after one year? We can promise you that we will promote our journal according to your suggestion as soon as possible.

Please pardon me if above our opinion to your criteria was impolite to you.

Best regards.

Sang-Uk Han, Editor in Chief, Journal of Gastric Cancer

Dear Kathy,

We appreciate you for your sincere evaluation of our journal and inclusion to ESCI. It is a great benefit for our journal to be connected with other privileged journals in Web of Science for the better presentation to worldwide researchers.

May we ask you a favour?

We and editorial board members re-read your comment as follows several time and discussed:

This title's contents and citations have improved but remain too dependent on Korean editorial board members and authors to justify adding to the Web of Science Core collection at this time.

We discussed what is the meaning of "too dependent on Korean editorial board members and authors." It is guessed that citation except from Korea was too low to be SCIE journal. However, the citation by other Korean researchers could not be controlled by editorial board members since many areas are concerned in gastric cancer besides our society members. We could not persuade them to cite our journal or refrain them from citing our journal. It is the natural phenomena that Korean researchers have cited research results from Korea.

We also calculated how much portion of citations from Korean researchers and editorial board members affected the total citation or recent year impact factors.

At first, numbers of article contributed to total citation from Web of Science were as followings:

2011, 1; 2012, 39; 2013, 126; 2014, 226; and 2015, 229.

Sum of total citation is 621. Out of them, number of articles from Korea is 163 (26.2%). According to year, the total citation from Korea is as follows:

2011, 1; 2012, 12 (30.8%); 2013, 37 (29.4%); 2014, 58 (25.7%); and 2015, 55 (24.0%).

The country that most frequently citing our journal is China 185 (29.8%), the second is Korea, the third is Japan

JGC 발전에 대한 논문 게재

SCIE re-evaluation 시기 앞당김

- 2018년 예정 → 2016년 11월 ~ 2017년 중순

- Editor 1 (Katherine Junkin Baumgartner)

Han Hong Lee
Assistant editor
Dear Dr. Lee,

Thank you for all your work and calculations in describing the *Journal of Gastric Cancer/JGC*. We do not simply determine if a given title meets a minimum threshold quality. Rather, our editors are curating a collection of materials--balancing the goals of a stable collection, the need to represent the entire world's most-needed materials, and the wish to ensure the Thomson Reuters journal list does not expand so much that it ceases to generate useful, focused search results.

We can re-evaluate the *Journal of Gastric Cancer/JGC* in 2-1/2 years, mid-2017, at which time your journals may have changed and our information needs may change.

We appreciate your continuing interest in Thomson Reuters products and services.

Best regards,

Katherine Junkins Baumgartner
Editor

- Editor 2 (Matt Rice)

Dear Han Hong Lee,

Thank you for your message and the information you provide below. I appreciate the amount of research you performed on behalf of the journal.

Thomson Reuters does not reopen evaluations once it has made its coverage decision. Per my original note, the journal is eligible for evaluation again in November 2018. In the meantime, we will index the journal in ESCI.

Issues will begin to appear in ESCI in January 2016. Once content has been indexed and displays in product, two things will occur: First, the journal will become discoverable to a much broader audience, enhancing its visibility in its field. Second, the journal's performances will become transparent not only to Thomson Reuters, but also to you, and the journal's authors, both those who have contributed and those who are considering doing so.

With the above in mind, I'm not able to tell you that we will evaluate the journal again at this time next year. **I recommend that we revisit that possibility in November 2016. Please be in touch with me then.** At that time, because the journal will be indexed in ESCI, its performance will be plain, and **it will be a simpler matter for both you and us to determine whether or not we should readjust the journal's evaluation schedule.**

I hope this outcome is acceptable to you. If you have any questions or concerns in the meantime, do let me know.

Best regards,
Matt
